

Keypack s.r.o., member of Gekoplast® & Karton Group

Keypack s.r.o. is a company offering service in the field of industrial packagings (data processing, development, design, samples) and subsequent production of industrial packagings. The main focus is the production of unique Kartonplast®/Tekpol® (cellular PP) and its processing (die-cutting, printing, welding) and production/processing of solid plastics and foils. Keypack's latest main branch is metal production-production of trolleys, rack containers, hand-operated machines (towers) with elaborate and sophisticated construction and top control and safety elements. We have own warehouses and provide own transportation and service teams.

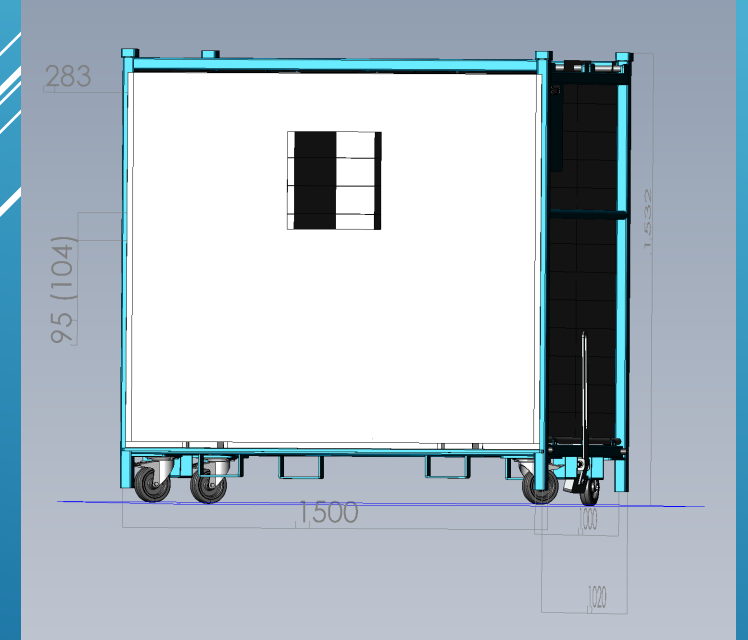

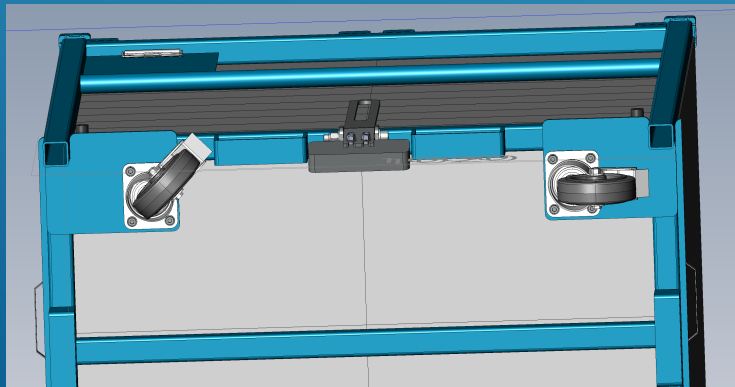

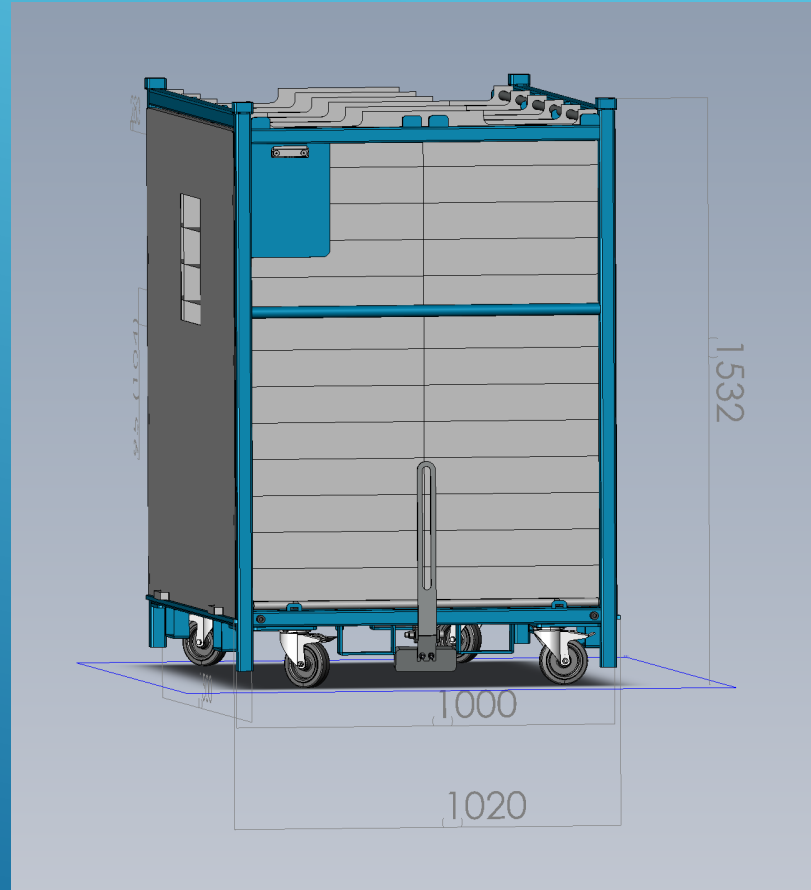

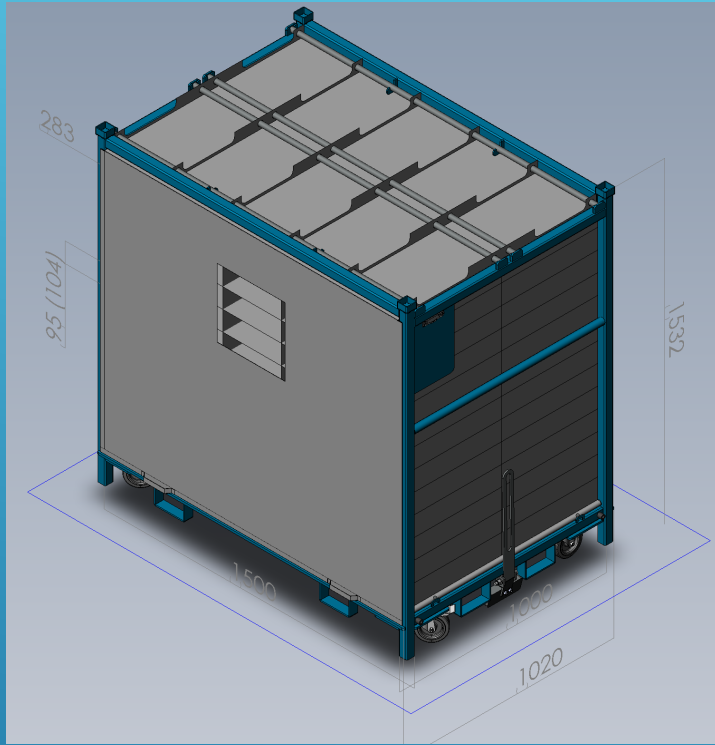

TROLLEYS

Internal logistics systems

DESIGN – development, 3D visualization

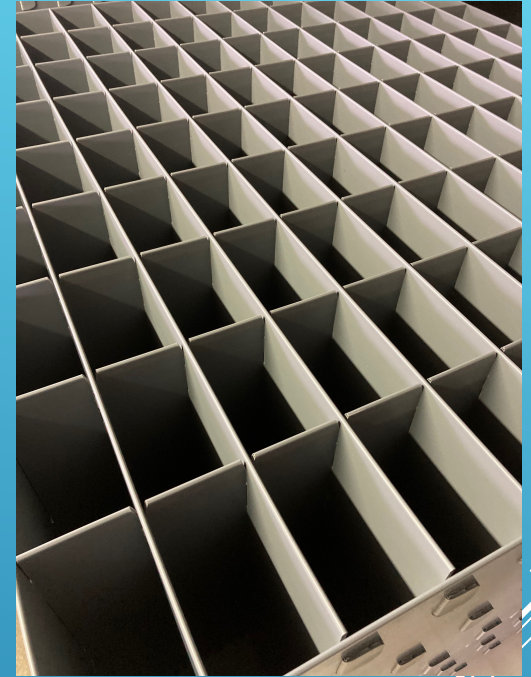

PROTOTYPE – production, testing, approval

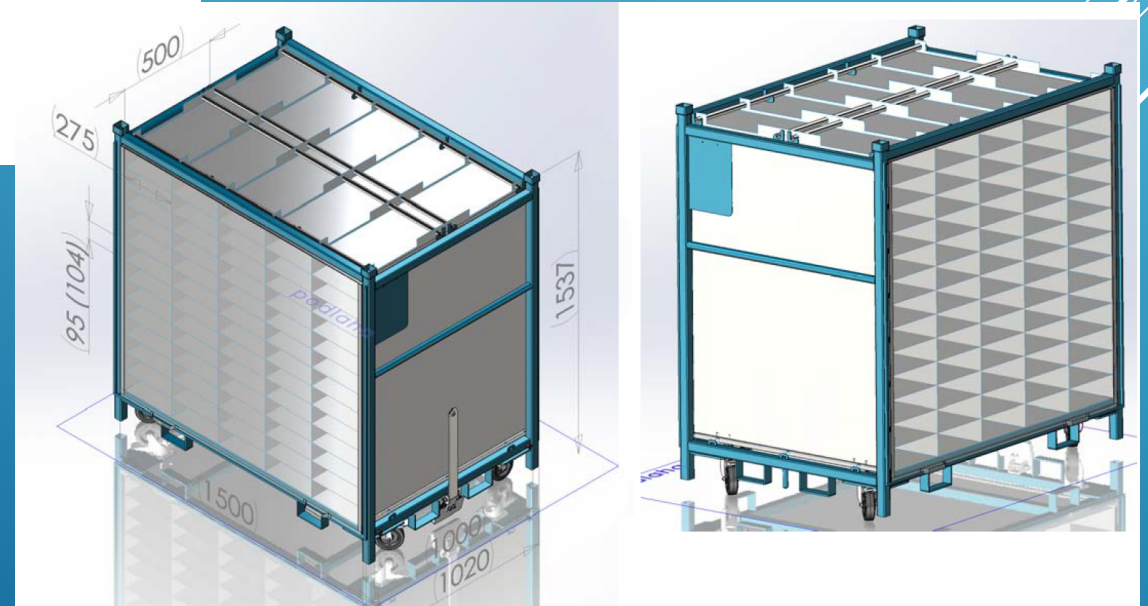

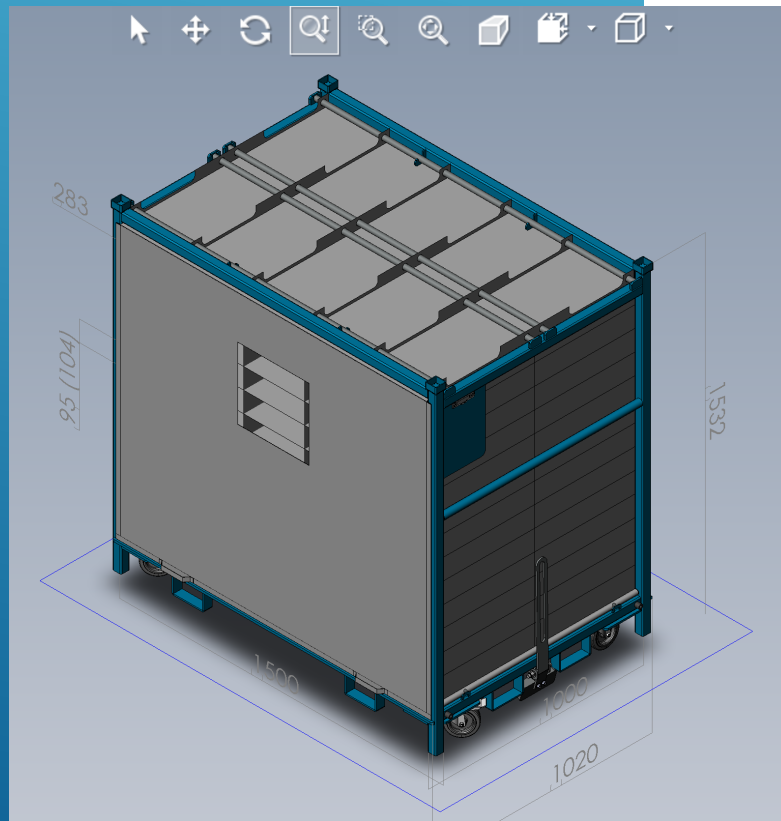

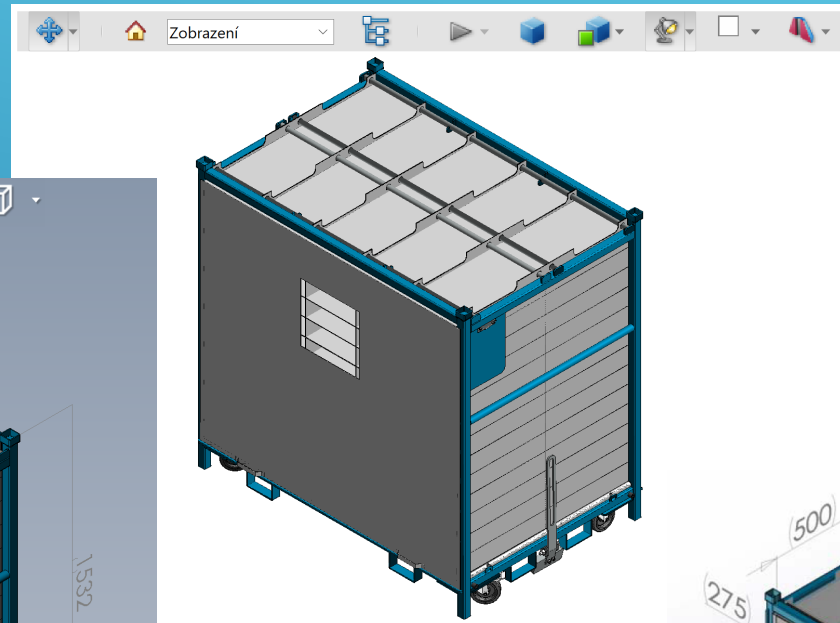

DETAILS – functionality, quality, design

VERSIONS – welded edges & kartonplast® inserts

SUPPORT - 3D PDF, e_Drawings, designs
